Purse Get Acquainted Game

Go around the room and have each lady say their name, then have them pull out the *most important item* to them out of their purse and explain what it is and tell why it is important to them to have in their purse or why they would never leave home without it.

Variation: Have each lady say their name, then have them pull out the *most unusual item* in their purse and explain what it is and why it is in their purse.

In The Bag

Place a number of items in a purse. Pass the purse around and allow for each lady to put their hand inside the purse for a total of 5 or 10 seconds (you decide how long you want them to have). Time is called and the lady must then hand the purse over to the next lady. After each one feels inside the purse they must then write down as many of the items as they can remember feeling inside the purse. The lady that has the most items (that are correct) wins the game.
